

# Ninety-eight

This is a simple counting and adding game for 2 or more players, using a standard 52 card deck.

## The Set up

- Remove the cards from the pack
- Remove the jokers from the deck
- Determine the first dealer
- Shuffle the cards (don't forget to offer a cut)
- Deal four cards to each player
- Place the remaining cards in the center of the table face down; this pile is known as the **stock pile**.

## The Play

- The player to the dealer's left begins and play continues in a clockwise direction.
- When it is your turn, place any one of your four cards, face up, beside the **stock pile**. This new pile is known as the **discard pile**.
- Call out the total value of **the discard pile**.
- Then draw the top card from the stock pile to replace the card you played.
- The person on your left plays next.

## The Strategy

The goal of the game is to avoid making the value of the discard pile *more than* 98. The person who makes the value of the discard pile *more than* 98 loses.

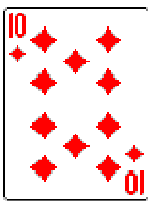

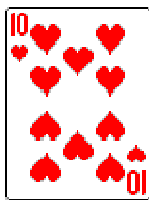

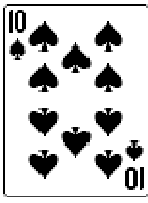

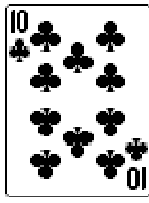

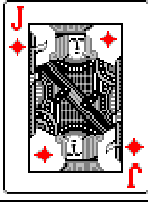

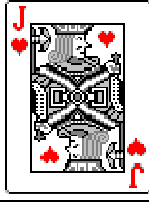

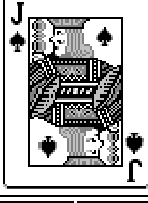

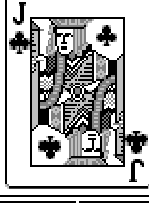

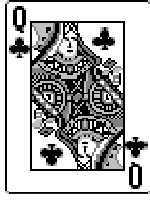

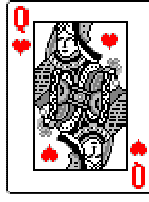

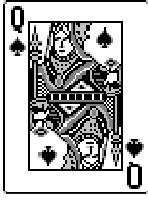

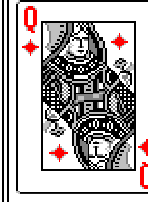

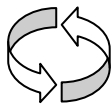

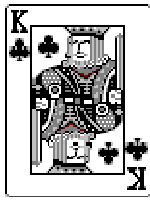

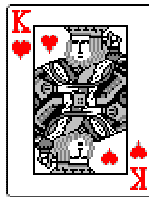

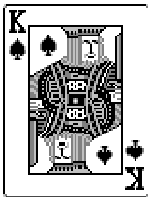

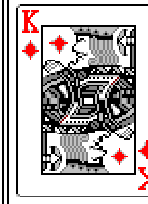

### A couple of useful translation when playing cards...
