

GOLF

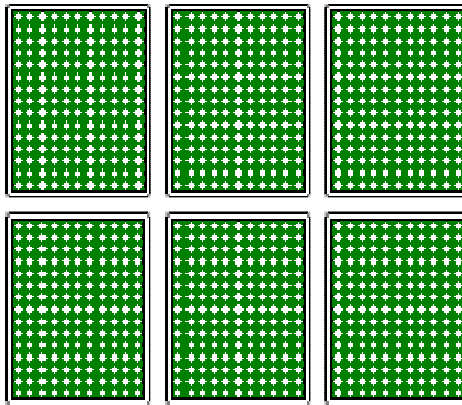

Object

Just like in real golf, the object of this game is to get the *lowest* score.

Players, Cards and Deal

The game can be played by two, three or four players using a standard 52-card deck. Starting with the person on the left, the dealer deals six cards to each player, one at a time, in a clockwise direction. The players must arrange their cards face down in a rectangle in front of them as shown here:

The remaining undealt cards are placed face-down in the center of the table to form a **stock pile**. The top card of the stock pile is turned face up and placed beside the stock pile to start the **discard pile**. Before play begins, players turn any two of their cards face up.

The Play

- The player to the dealer's left begins, and the turn to play moves clockwise.
- At your turn you must either a) draw the top card of the stock pile, or b) draw the top card from the discard pile.
- You may use the card you draw to replace *any* one of the six cards of your layout.
- If you choose to replace a face-down card you are not allowed to look at it before replacing it.
- You may choose to replace a face-up card
- If you choose not to use the card you have drawn, simply discard it to the top of the discard pile.

The hand ends as soon as one player has all six cards face up. As soon as any one player has all six of his or her cards face up, play is stopped and the hand is scored.

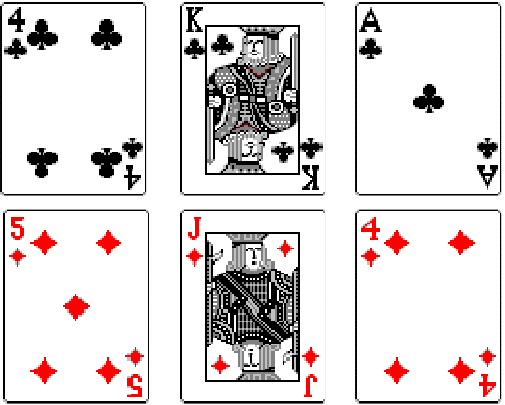

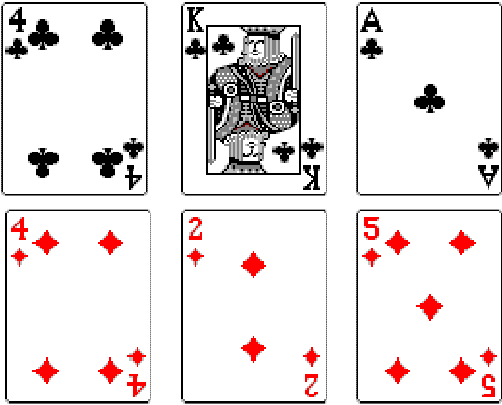

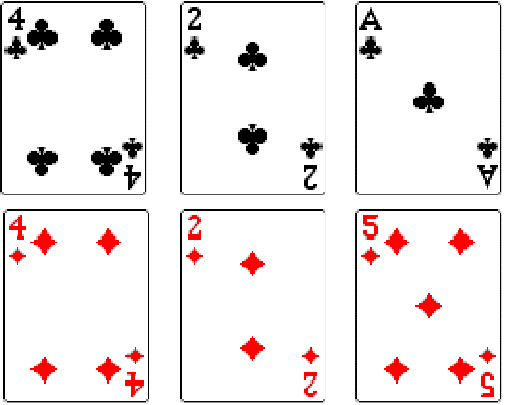

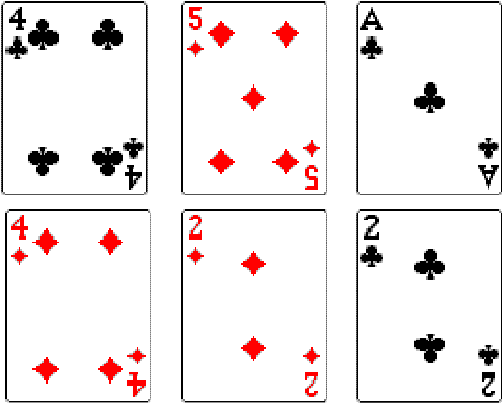

Scoring

At the end of the play, each player's layout of six cards is turned face-up and scored as follows:

- Ace = 1 point.
- Two = minus 2 points.
- 3 to 10 scores face value (3 = 3 points, 7 = 7 points etc.)
- Jack = 10 points
- Queen = 10 points
- King = 0 points.
- A pair in the same column = 0 points (even if it is a pair of twos)

The player who has the lowest cumulative score after nine holes wins.

Look at these examples. How many points are scored in each hand? Write your answer in the space provided.
